THE WORLD'S POPULATION.

It Could All Find Standing Room on One of England's Shires.

England today contains 30,000,000 people, but it has trebled its population in the course of a century, inasmuch as the population was 10,000,000 on the necession of the Hanoverian dynasty. At the time of the great revolution in 1688 England contained 5, 500,000, while London, now 5,500,000, contained only 500,000 inhabitants.

It further appears that the entire population of the country was under 1,000,000 when the "Domesday Book" was compiled shortly after the Norman conquest.
